

Illinois Renewable Energy Disclosure Label  
 Clearview Electric, Inc. DBA Clearview Energy  
 June 1, 2017 – May 31, 2018

Renewable Energy Disclosure Label		
Category	Description	%
Clearview Energy Supply %	% of energy supplied to you	100%
Illinois RECs	% of RECs sourced from within state	0%
National Hydro RECs	% of RECs sourced nationally, above the RPS	100%
Renewable Portfolio Standard (RPS)	% of renewable energy required to meet the RPS	7.5%
Total REC % purchased by Clearview Energy	Electricity % paired with RECs	107.5%

Clearview Energy, along with all other suppliers, is required by law to comply with the Illinois Renewable Portfolio Standard (RPS).

Note: Electricity is the product of a mix of generation energy sources that is delivered over a system of wires. You will not have electricity from a specific generation facility delivered to your service address, but Clearview Energy ensures that 100% of your electricity usage is matched by the generation of energy from renewable resources on an annual basis. Clearview Energy does so by purchasing and retiring Renewable Energy Certificates (RECs) representing the environmental attributes associated with renewable energy generated in the United States.

Your purchase helps support the development and operation of renewable resources. Clearview Energy may take up to three months after the close of the energy year to make up any deficiency in the renewable resource content for your product. Clearview Energy has not committed to a particular renewable energy resource or location of resource at the time of marketing your product.
